VOICE COMMAND MODULE

VOICE COMMAND MODULE

THE **NO HANDS-VOICE** COMMAND SYSTEM FOR COMPUTERS

***Now** it's as **easy as talking** to maintain and expand your computer's usefulness at school, at home, or at work, by using ENG's VCM™ voice command module.*

*The VCM™ is a high-performance, reliable, low-cost personal communication system that let's you command and access software applications with your **spoken** word.*

ENG'S VCM is fast, efficient, expandable and the number of voice commands is only limited by you. Field tested for durability and quality, the VCM uses fast "machine code," requiring less memory than other more costly systems.

Now you can get more from your computer with VCM . . . and all you have to do is talk.

VCM COMPONENTS
